Office Hours: Monday, 2:30-3:45
 Wednesday, 2:30-4:30
 Friday, 2:30-4:30

Text: *Elementary Linear Algebra*, 8th edition, by Bernard Kolman and David R. Hill. We will cover chapters 1-7 with some sections omitted.

There will be two hour exams during the semester (parts may be take-home) each counting 100 points. The final exam will count 200 points and is scheduled for **2:00 pm, Saturday, December 15**. I will try (subject to room availability) to arrange an alternate time during the Math Block at **2:00 pm, Thursday, December 13**. There will also be some graded problem sets and quizzes counting for a total of 100 points. The final grade will be based on total points. It is possible that the scores will be curved at the end of the semester, but in no case will the grading scale be more severe than a 10 point percentage scale. *No make up exams will be given.*
